

Drainage, Sand and Slurry Pumps

Professional Submersible Pumps

Submersible Contractors Dewatering Pump

DanPumps TBZ

DanPumps TBZ-series durable pumps are ideal for draining in civil engineering applications, but they are also suitable for a wide range of general pumping tasks.

Both the motor and pump casing are constructed from tough cast iron, ensuring long-term durability. Maximum submersion depth is greatly increased due to a mechanical seal resistant to high pressure. The semi-open impeller made from high chrome alloy works in combination with a ductile iron wear plate, offering excellent durability.

Motor cooling is efficiently managed through a discharge channel that is integrated into the motor housing. The top discharge design also contributes to the pump's compact, space-efficient layout.

The discharge outlet comes in sizes ranging from 50 mm to 150 mm, with motor power options from 1.5 kW to 15 kW. For motors under 15 kW, a built-in thermal protection system is included in the hermetically sealed design.

Technical Specifications:

- Capacity: up to 156 m³/h
- Head: up to 56 m
- Power: 1.5 kW to 15 kW
- Power supply: Three phase 400 V \pm 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 20 m
- Water temperature: up to 40°C
- Max. water depth: 25 m

Application:

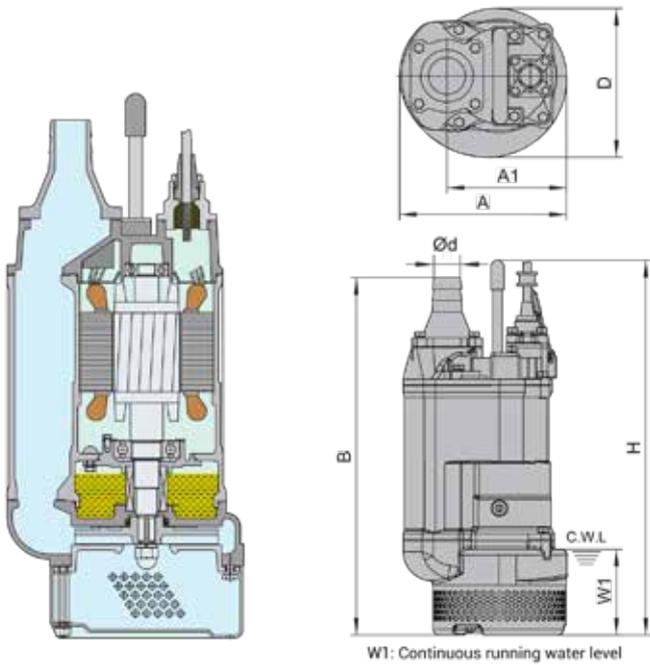

- Construction sites
- Mining and industrial sites
- Drainage of contaminated water
- General pumping purposes

Optional Features:

- Alternative voltages
- Custom cable lengths

Automatic Submersible Contractors' Dewatering Pumps

DanPumps TBZE

The TBZE series of heavy-duty pumps are ideal for drainage in civil engineering projects, while also being suitable for general pumping applications.

The motor and pump housing are constructed from durable cast iron, ensuring long-lasting performance. A high-pressure-resistant mechanical seal allows for deeper submersion. The semi-open impeller, made from high chrome alloy, works alongside a ductile iron wear plate to deliver exceptional durability.

Motor cooling is efficiently managed by the design of a discharge channel integrated within the motor housing. The compact design is further enhanced by a top discharge outlet. The discharge outlet size ranges from 50 mm to 100 mm, with motor options spanning from 1.5 kW to 5.5 kW.

TBZE-series pumps are equipped with a built-in intelligent control system that enables automatic operation. This system helps users reduce energy consumption, making it a cost-effective solution for construction or industrial sites.

Technical Specifications:

- Capacity: up to 105 m³/h
- Head: up to 34 m
- Power: 1.5 kW to 5.5 kW
- Power supply: Three phase 400 V ± 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 20 m
- Water temperature: up to 40°C
- Max. water depth: 25 m

Application:

- Construction sites
- Mining and industrial sites
- Drainage of contaminated water
- General pumping purposes

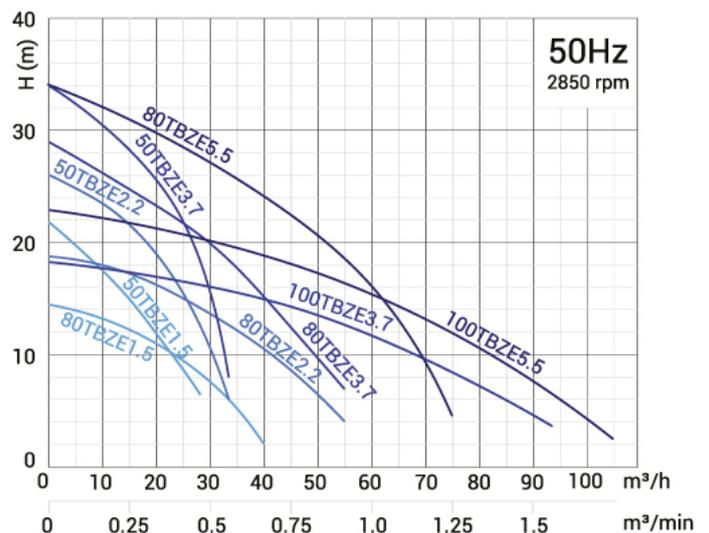

Optional Features:

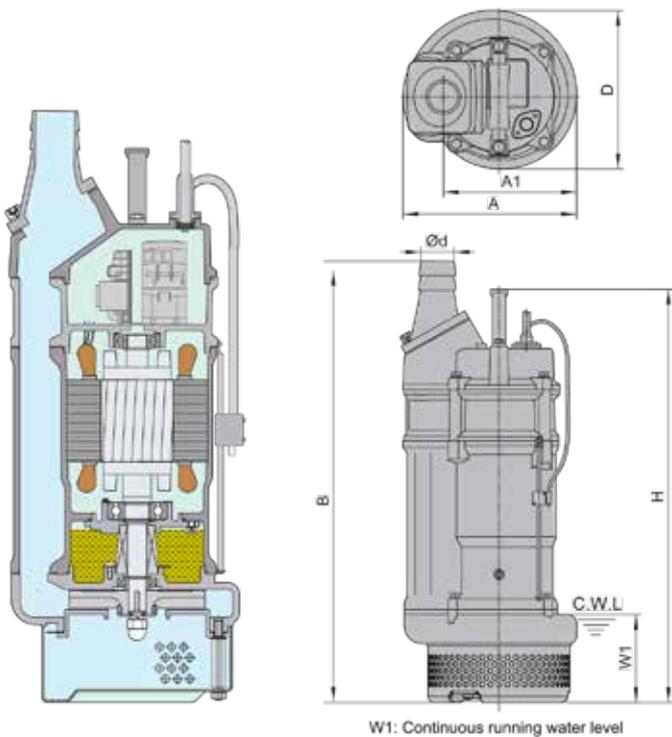

- Alternative voltages
- Custom cable lengths

Key features of TBZE intelligent control system

- Protects against reverse phase, ensuring correct impeller rotation
- Protects against open phase or impeller jam, thus preventing accidental damage
- Automatically stops the pump in case of overload or abnormal voltage, with recovery occurring after 5 minutes
- The pump stops working at high temperature, and it will automatically restart after cooling to the specified temperature
- The water level sensor's height is adjustable to control pump operation
- The pump stops working within 60 seconds when the water level is below the water level probe, remaining inactive for 180 seconds. After the 180 seconds, if the water level is above the water level sensor, the pump resumes operation
- Includes assessment of the pump's operation and malfunction history

Submersible Lightweight Dewatering Pump

DanPumps TBA

The new DanPumps TBA series pumps maintain the same durability as other models in the DanPumps range of drainage, sand, and slurry pumps while offering increased portability thanks to their aluminium motor housing. In comparison to other lightweight pumps, the cast aluminium casings provide greater strength than those made from metal sheets.

The TBA series is well-suited for dewatering at construction sites, tunnelling, mining operations, rental fleets, and other tough applications where a combination of light weight and strength is required.

TBA models can be fitted with an intelligent electrode control system (available for TBAE models up to 2.2 kW). Additionally, 1.5 kW models of the TBA series are available in single-phase versions.

Technical Specifications:

- Capacity: up to 54 m³/h
- Head: up to 35 m
- Power: Single phase 1.5 kW
Three phase: 1.5 kW to 5.5 kW
- Power supply: Single phase 230 V \pm 10 %, 50 Hz
Three phase 400 V \pm 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 20 m
- Water temperature: up to 40°C
- PH: 6.5 to 8.5
- Max. water depth: 25 m

Application:

- Construction sites
- Underground tunnelling and mining works
- Rental

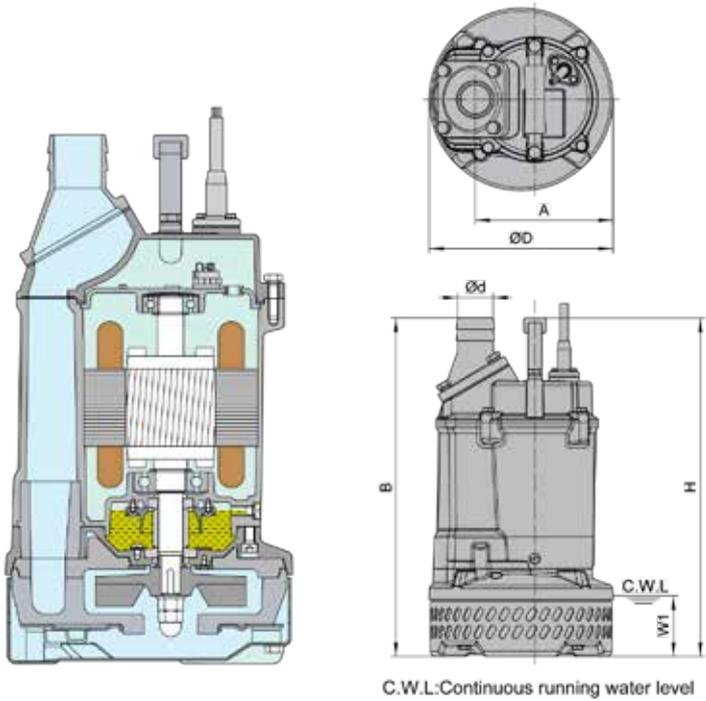

Optional Features:

- Alternative voltages
- Custom cable lengths

Submersible Agitator Pumps

DanPumps TBD

The DanPumps TBD agitator series features cast iron, heavy-duty slurry and sand pumps built on the reliable TBZ pump design.

These pumps come with agitators to facilitate smooth suction of the pumped media. The side-flow, top-discharge configuration ensures effective motor cooling, even during continuous operation in partially submerged conditions.

TBD pumps are ideal for handling water mixed with sand, and bentonite slurry, and are commonly used in applications such as slurry drilling, draining slurry-contaminated water in civil engineering projects, cleaning sand pits, and more.

Technical Specifications:

- Capacity: up to 100 m³/h
- Head: up to 32 m
- Power: 1.5 kW to 5.5 kW
- Power supply: Three phase 400 V±10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 20 m
- Water temperature: up to 40°C
- Max. water depth: 25 m

Application:

- Construction sites
- Mines and quarries
- Sandpits and sedimentation tanks at wastewater treatment plants
- Transfer of bentonite slurry and sandy sludge
- Transfer of water containing mud and sand

Optional Features:

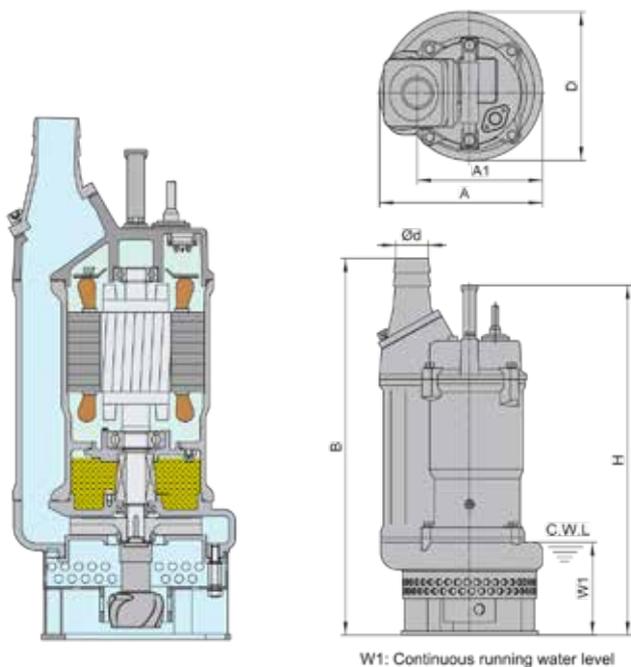

- Alternative voltages
- Custom cable lengths

- Max. water depth: 25 m

Application:

- Construction sites
- Mines and quarries
- Sandpits and sedimentation tanks at wastewater treatment plants
- Transfer of bentonite slurry and sandy sludge
- Transfer of water containing mud and sand

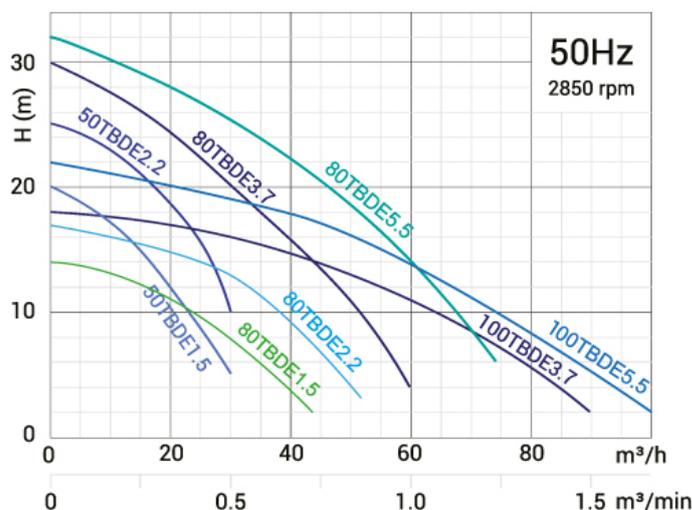

Optional Features:

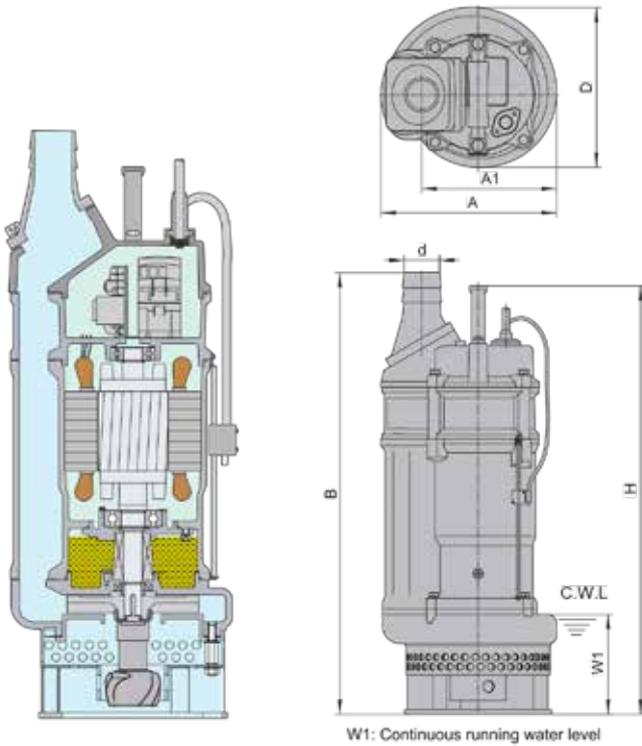

- Alternative voltages
- Custom cable lengths

Key features of TBDE intelligent control system

- Protects against reverse phase, ensuring correct impeller rotation
- Protects against open phase or impeller jam, thus preventing accidental damage
- Automatically stops the pump in case of overload or abnormal voltage, with recovery occurring after 5 minutes
- The pump stops working at high temperature, and it will automatically restart after cooling to the specified temperature
- The water level sensor's height is adjustable to control pump operation
- The pump stops working within 60 seconds when the water level is below the water level probe, remaining inactive for 180 seconds. After the 180 seconds, if the water level is above the water level sensor, the pump resumes operation
- Includes assessment of the pump's operation and malfunction history

Submersible Sand / Slurry Agitator Pumps

DanPumps TBS

The heavy-duty TBS-series sand and slurry pumps, featuring a 4-pole motor, provide reliable performance and extended operational periods in challenging conditions.

Equipped with a high-chrome alloy impeller and an agitator, TBS pumps are ideal for transferring water mixed with sand and slurry. They are commonly used in mining, construction, and municipal wastewater treatment applications, including cleaning sand pits, deepening bottoms, and pumping water laden with significant amounts of slurry, sand, and abrasive materials.

Technical Specifications:

- Capacity: up to 390 m³/h
- Head: up to 42 m
- Discharge: 80 mm to 200 mm
- Power: 4 kW to 37 kW
- Power supply: Three phase 380 V \pm 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 8 m or 20 m
- Water temperature: up to 40°C
- Max. water depth: 15 m

Application:

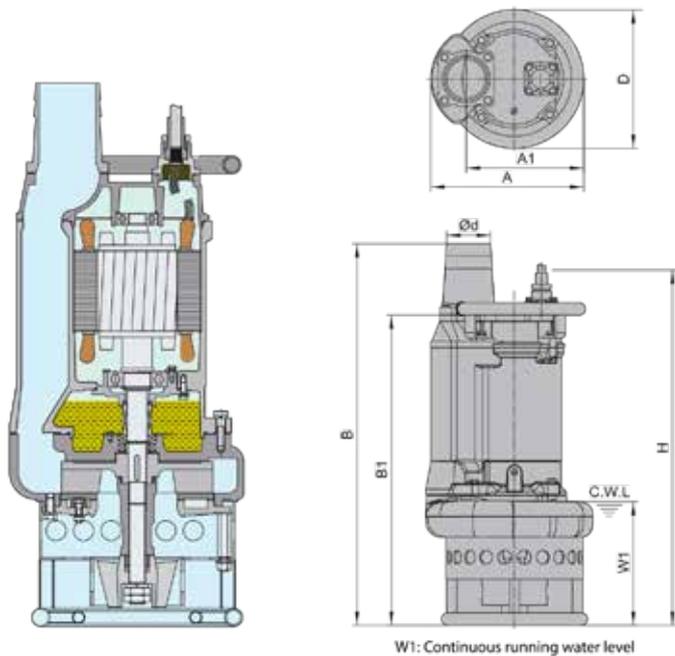

- Mines and quarries
- Construction sites
- Wastewater treatment plants
- Transfer of water high in slurry, sand and abrasive particles
- Bottom deepening
- Cleaning of sand pits, sludge tanks and tailings ponds

Optional Features:

- Alternative voltages
- Custom cable lengths

High Head Dewatering Pumps

DanPumps MH (11-45 kW)

MH-series submersible pumps with strong construction are designed to withstand the high pressure during deep well dewatering. The motor and pump casing are made of rigid cast iron for long-lasting durability.

The maximum submersion depth is greatly increased due to a special mechanical seal resistant to high pressure.

The motor is cooled by the pumped water for safe operation even when the pump is operated continuously in a semisubmerged condition. The space-saving design features a top outlet.

Discharge sizes range from 80 mm to 200 mm, with motor sizes ranging from 11 kW to 45 kW. The pumps are equipped with dry-type submersible induction motors (2 poles).

Technical Specifications:

- Capacity: up to 372 m³/h
- Head: up to 90 m
- Power: 11 kW to 45 kW
- Supply voltage: Three Phase 380 V \pm 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 20 m
- Water temperature: up to 40°C
- Max. water depth: 30 m

Application:

- Mining and industrial sites
- Construction sites
- Deep-well and high-head dewatering
- Drainage of contaminated water
- General pumping purposes

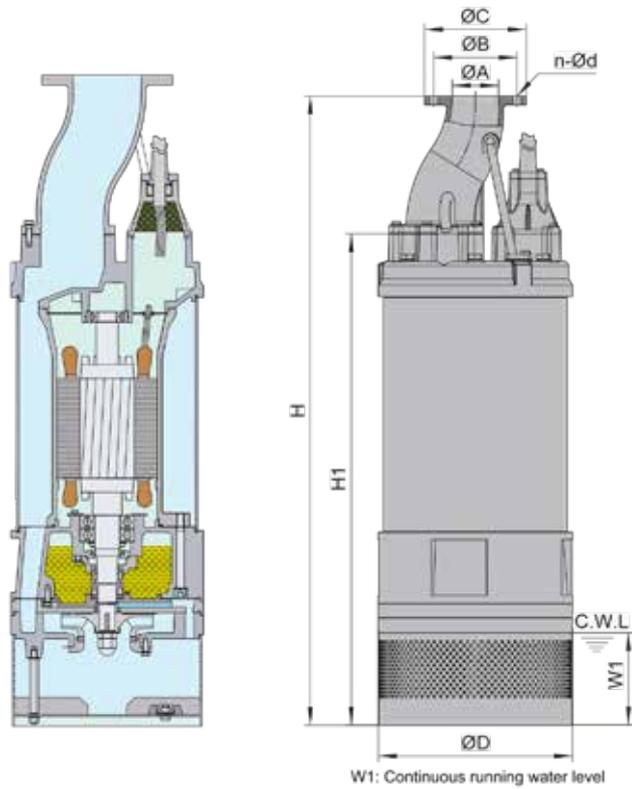

Optional Features:

- Alternative voltages
- Custom cable lengths

Portable Drainage Pump

DanPumps PS(M)

The PSM series portable drainage pumps come with semi-vortex impellers and integrated agitators attached to the shaft. These characteristics promote efficient pumping of contaminated water and reduce the risk of clogging during operation.

Technical Specifications:

- Water temperature: up to 40°C
- PH: 6.5 to 8.5
- Power supply: Single phase 220 V± 10 %, 50 Hz
Three phase 380 V± 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 10 m
- Max. water depth: 10 m

Application:

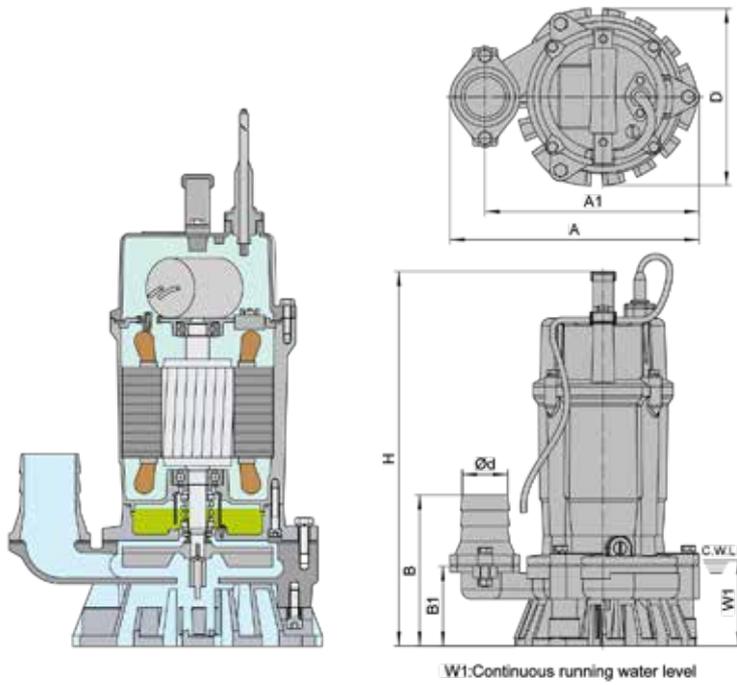

- Construction sites
- Mining and industrial sites
- Drainage and contaminated water
- General pumping purposes

Optional Features:

- Alternative voltages
- Custom cable lengths

Portable Drainage Pump

DanPumps TSAE

DanPumps TSAE series portable drainage pumps feature top discharge for effective cooling and a space-saving design. These compact and robust pumps can be used for various construction dewatering and other general drainage applications.

TSAE series pumps operate automatically with the help of a built-in intelligent control system. This system helps the end user reduce electricity costs at the construction or industrial site.

Technical Specifications:

- Power supply: Single phase 230 V \pm 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 10 m
- Water temperature: up to 40°C
- PH: 6.5 to 8.5
- Max. water depth: 10 m

Application:

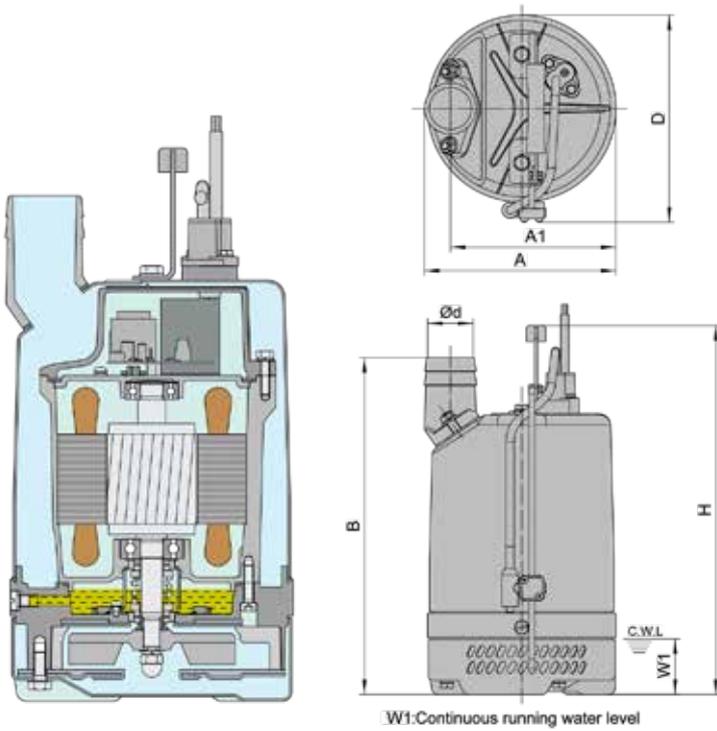

- Construction sites
- Underground tunnelling and mining works
- Drainage of contaminated water

Optional Features:

- Alternative voltages
- Custom cable lengths

Key features of TSAE intelligent control system

- Automatically stops the pump in case of overload or abnormal voltage, with recovery occurring after 5 minutes
- The pump stops working at high temperatures and will automatically restart after cooling to the specified temperature
- The water level sensor's height is adjustable to control pump operation
- The pump stops working within 60 seconds when the water level is below the water level probe, and remaining inactive for 180 seconds. After the 180 seconds, if the water level is above the water level sensor, the pump resumes operation
- Protects against impeller jam, thus preventing accidental damage
- Includes assessment of the pump's operation and malfunction history

Submersible Drainage Pumps

DanPumps TS(M)

DanPumps TSM series pumps are compact, high-performance, durable 1-phase submersible pumps used for handling abrasive and/or corrosive liquids at tough job sites, including mines, industries, public utilities, and construction sites.

The pump body and parts in contact with water are built of cast iron or stainless steel (at the customer's option). Depending on the application, pumps are equipped with a semi-open impeller made of high-chrome alloy or stainless steel.

Effective motor cooling is achieved due to the inclusion of a discharge channel integrated into the motor housing. Discharge outlets range from 50 mm to 80 mm, with motors ranging from 0.25 kW to 1.5 kW.

Hermetically sealed motors are equipped with built-in thermal protection.

Technical Specifications:

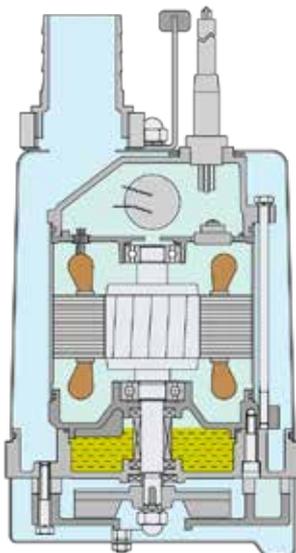

- Capacity: up to 42 m³/h
- Head: up to 21 m
- Power: 0.25 kW to 1.5kW
- Power supply: Single phase 220 V ± 10%, 50 Hz
- Insulation class: F
- Protection class: IP68
- Water temperature: up to 40° C
- Max. water depth: TSM 0.25 ~ 0.75 kW: 10 m
TSM 1.5 kW: 25 m

Application:

- Construction sites
- Mining and industrial sites
- Drainage and contaminated water
- General pumping purposes

Optional Features:

- Alternative voltages
- Custom cable lengths

Portable Residue Dewatering Pump

DanPumps TSM(G)

TSM(G) series are portable residue dewatering pumps, capable of pumping down to the floor, allowing even the smallest puddle to be pumped dry. TSM(G) pumps are ideal for complete drainage of flat surfaces where a sump is not available, such as basements, parking lots, roads, and swimming pools. These pumps can continuously pump water at a depth of 1 mm and are equipped with a swing valve that prevents reverse flow of the sucked water when the pump stops its operation.

Technical Specifications:

- PH: 6.5 to 8.5
- Power supply: Single phase 220 V \pm 10 %, 50 Hz
- Insulation class: F
- Protection class: IP68
- Cable length: 8 m
- Water temperature: up to 40°C
- Max. water depth: 10 m

Application:

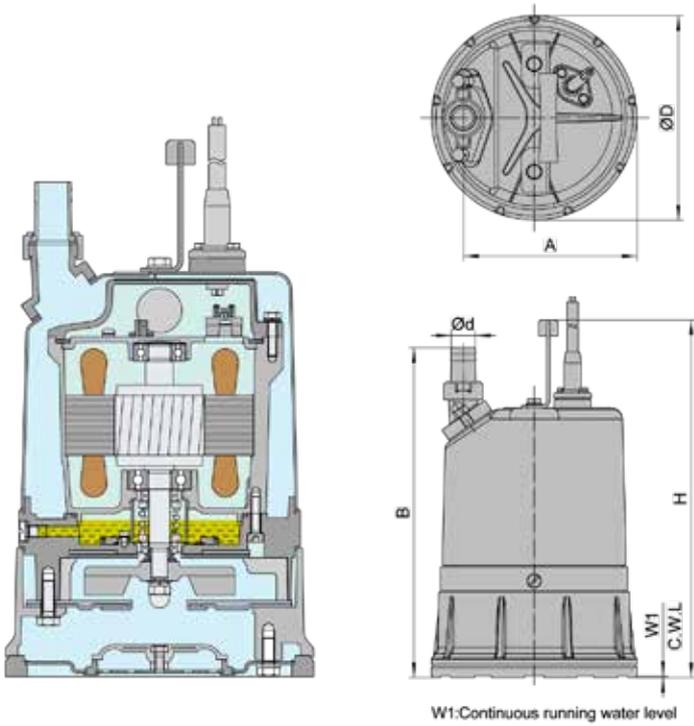

- Civil engineering
- Building sites
- Basements or other utility pits
- Rainwater and mud water

Optional Features:

- Alternative voltages

Stainless Steel Drainage Pumps

DanPumps TSS

Submersible stainless steel TSS series pumps are used for the transportation of chemically aggressive and abrasive liquids at mining and industrial sites. All parts of the pumps in contact with water are made of stainless steel.

Effective motor cooling is achieved due to the inclusion of a discharge channel integrated into the motor housing.

Discharge outlets range from 50 mm to 150 mm, with motors ranging from 1.5 kW to 11 kW. Hermetically sealed motors are equipped with built-in thermal protection.

Technical Specifications:

- Capacity: up to 150 m³/h
- Head: up to 48.5 m
- Power: 1.5 kW to 11kW
- Power supply: Three phase 400 V ± 10%, 50 Hz
- Insulation class: F
- Protection class: IP68
- Water temperature: up to 40° C
- Max. water depth: 25 m

Application:

- Industrial sites
- Mining sites and quarries
- Drainage and contaminated water
- Wastewater treatment plants

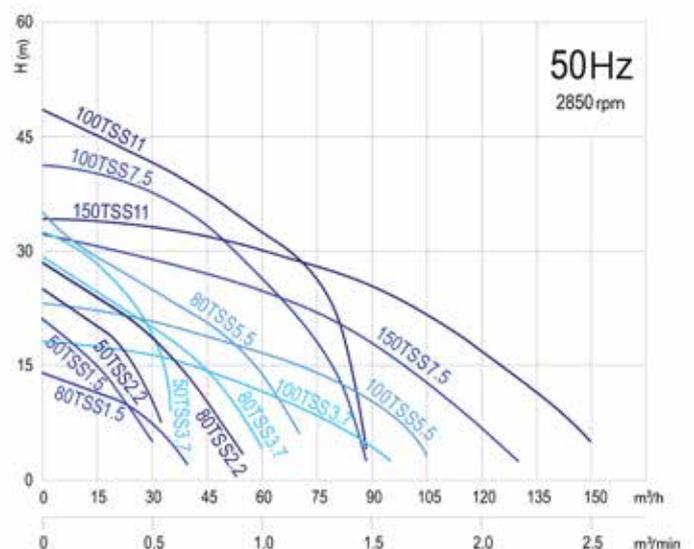

Optional Features:

- Alternative voltages
- Custom cable lengths

About DanPumps A/S

DanPumps has been dedicated to providing pumping solutions to utility companies and industries since 2013. In November 2023, DanPumps once again became an independent company, concluding a successful period under SonFlow's guidance. Today, our unwavering commitment is directed towards the development and manufacturing of quality pumps.

Wide Range of Pumps

The range of pumps at DanPumps A/S is continually evolving, and our ability to deliver customized solutions makes us one of the most flexible and competitive suppliers in the market.

Our pump range is the result of high efficiency, intelligent design, and practical features. These qualities are combined to create user-friendly pumps with a long lifespan. We provide pumps for a wide range of applications, including wastewater, marine, industrial, and sanitary purposes.
